FDD Abstract

PROJECTS OF SAG "KABEL"; (3 pp; German; November 1950)

25X1X

This document consists of two tables. The first, covering two pages and dated 24 November 1950, is a draft of a supplemental plan for the research and experimental work to be done by the Soviet Corporation (SAG) "Kabel" in 1951-52 for the Ministries of the USSR (according to orders from the Ministries dated 15 November). The projects listed are:

1. 12-ray oscillograph
2. 4-ray oscillograph
3. single-circuit oscillograph
4. zirconium lamp
5. impulse light source
6. electric furnace to fire very large steatite insulators
7. carbon-filament electrodes for metals microphotography
8. small heavy-duty storage battery
9. AC bridge for frequencies of 400 - 100 cycles, combined with an a-f oscillator, a filter, and a measuring device
10. electrodynamic voltmeter
11. AC voltmeter
12. generator test stand.

The second table, one page, dated 25 November 1950, lists projects abandoned or interrupted prior to 1 October 1950. These projects are:

1. a starter mechanism for cranes
2. ferrograph for measuring magnetic current
3. heterodyne wavemeter
4. condensers.

Both tables are marked "translation" (presumably from Russian). There is no indication as to the office or agency which prepared them, except that the first one indicates that the original was signed by two Soviet officials of SAG "Kabel".

FDD Abstract

25X1X

PROBABLE SOVIET NAVAL STRATEGY IN THE BALTIC IN THE EVENT OF WAR (6 pp; German; February 1951)

three-page

An original and a carbon copy of a typewritten report on probable Soviet naval activities and potentialities in the Baltic in the event of war.

The report is drawn up mainly on the basis of geographical knowledge of the area and experience in naval strategy. Although source appears to have some knowledge of current Soviet activities (such as practice maneuvers in mine-sweeping, creation of a restricted area along the German coast, ship-building), and mentions them in support of his theories, he does not appear to have detailed "inside information."
